

Peter Hansbo - Jönköping University, Sweden

Talk title	Developments in Cut Finite Element Methods
Biography	<p>Born in Stockholm 1959, studied Civil Engineering at Chalmers University of Technology with a PhD in Structural Mechanics in 1989.</p> <p>Author of over 100 journal papers in the field of finite element methods and its application to problems in solids, fluids, acoustics and electromagnetics. Currently works as professor in Computational Engineering at Jönköping University and prior to that at Chalmers University of Technology in Gothenburg and the Royal Institute of Technology in Stockholm.</p>
